Applicants' remarks and amendments, filed on June 2, 2006, have been carefully considered. No claims have been canceled or added; claims 39-66 and 71-75 remain pending in this application.

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Applicants' Priority Document was filed on January 19, 2005.

***Withdrawn Rejection***

The 103(a) rejection of claims 39-66 and 71-75 as being unpatentable over Bartley (U. S. Patent No. 5,179,056) stated in the previous Office Action, has been withdrawn in view of Applicants' persuasive arguments traversing this rejection.

***Allowable Subject Matter***

2. Claims 39-66 and 71-75 are allowed.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the claimed process for preparing a catalyst, wherein microspheroidal particles are impregnated via incipient wetness with an aqueous solution of palladium and gold compounds, said impregnation

Art Unit: 1755

performed during agitation, followed by drying the impregnated particles (said drying also performed during agitation), and reduction of the dried particles by adding them, with stirring, to an aqueous solution of hydrazine to form a slurry.

The process steps performed with agitation or stirring are not taught or suggested by Bartley; nor does this reference teach or suggest the claimed step of drying the impregnated particles prior to reduction.

For these reasons, in addition to Applicants' arguments traversing the rejection of record, claims 39-66 and 71-75 are allowable over the Bartley reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
